# The Webalizer

100% Proud to be  
Microsoft free!

## What is it?

*The Webalizer* is a fast, free web server log file analysis program. It produces highly detailed, easily configurable usage reports in HTML format, for viewing with a standard web browser.

## Features

- Is written in C to be extremely fast and highly portable. On my 1.6Ghz laptop, it can process close to 70,000 records per second, which means a log file with roughly 2 million hits can be analyzed in about 30 seconds.
- Handles standard [Common](#) logfile format (CLF) server logs, several variations of the NCSA [Combined](#) logfile format, wu-ftp/proftpd [xferlog](#) (FTP) format logs, [Squid](#) proxy server native format, and [W3C Extended](#) log formats. In addition, gzip (.gz) and bzip2 (.bz2) compressed logs may be used directly without the need for uncompressing.
- [Generated reports](#) can be configured from the command line, or more commonly, by the use of one or more [configuration files](#). Detailed information on configuration options can be found in the [README](#) file, supplied with all distributions.
- Supports multiple languages. Currently, Albanian, Arabic, Catalan, Chinese (traditional and simplified), Croatian, Czech, Danish, Dutch, English, Estonian, Finnish, French, Galician, German, Greek, Hungarian, Icelandic, Indonesian, Italian, Japanese, Korean, Latvian, Lithuanian, Malay, Norwegian, Polish, Portuguese (Portugal and Brazil), Romanian, Russian, Serbian, Slovak, Slovene, Spanish, Swedish, Thai, Turkish and Ukrainian are available.
- Unlimited log file sizes and partial logs are supported, allowing logs to be rotated as often as needed, and eliminating the need to keep huge monthly files on the system.
- Fully supports IPv4 and IPv6 addresses. Includes built-in distributed DNS lookup capability and native Geolocation services.
- Distributed under the [GNU General Public License](#), complete source code is available, as well as binary distributions for some of the more popular platforms. Please read the [Copyright notices](#) for additional information.

## What Now?

Go to the [download page](#) and get yourself a copy. If you run into problems, check the [installation instructions](#) and [Frequently Asked Questions](#) to see if your problem/question has already been addressed. If you are new to server analysis and don't have a clue, try reading our [Simpletons guide to web server analysis](#). If you send us an e-mail about a problem or question, please send it in plain text, [not HTML format](#), as otherwise it will be routed to the bit bucket never to be seen again.
